ADEGBOLA TIMOTHY

FRONTEND DEVELOPER & UI/UX DESIGNER

PROFILE

Frontend Developer and UI/UX Designer skilled in HTML, CSS, JavaScript, React and Figma. Passionate about building clean, user-friendly interfaces and solving real-world problems through design and code.

Currently building real-world projects and expanding into full-stack development. Seeking for Junior development roles to grow and contribute.

PROJECTS

PROJECT SCHOOLBOY (ONGOING)

Student Payment Management Platform

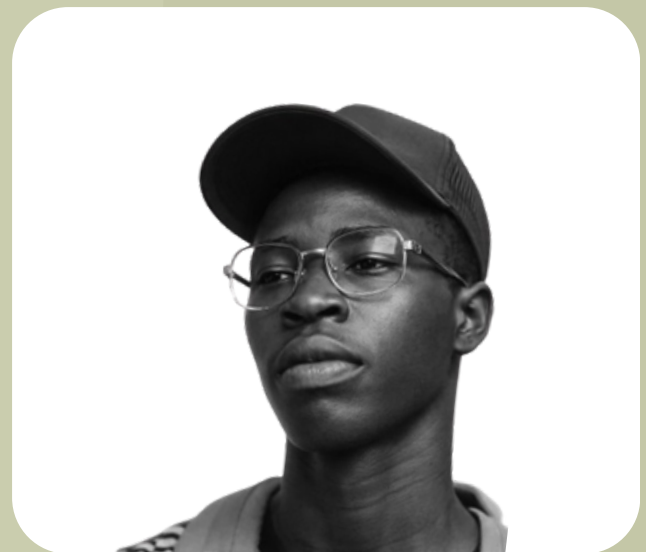

- Designed a student payment system for managing shared expenses
- Created dashboard UI in Figma for payment tracking
- Building responsive frontend interface
- Tech: HTML, CSS, React, Node.js, MongoDB

Check out my GitHub page to follow on the project's growth: <https://github.com/Timmy-tek>

L!nkUp - UX/UI Designer

A campus-based social platform solving fragmented communication and low event visibility among students.

I Collaborated in a design team to conduct user research, translate insights into product decisions, and design key features such as event feeds, event radar, and user onboarding experiences.
